## SOFTWARE DEVELOPER

**Web Developer | ReactJS Developer | UI/UX Researcher**

*Results-driven Software Developer with a passion for web development, ReactJS, and UI/UX research. Seeking a challenging position where I can leverage my expertise in building mobile-first responsive websites and creating exceptional user experiences. Committed to delivering clean and efficient code, I aim to contribute to a tight-knit team environment, participate in design discussions, and collaborate on sprint planning and deployments. With a strong desire to learn and grow quickly, I am excited to join a company that fosters collaboration, innovation, and continuous improvement in web development.*

---
